

TEXAS INDUSTRY PROFILE

Machinery Manufacturing
NAICS 333 (Private Industry Only)

Industry Description

Industries in the Machinery Manufacturing subsector create end products that apply mechanical force to perform work. Some important processes for the manufacture of machinery are forging, stamping, bending, forming, and machining that are used to shape individual pieces of metal. Processes, such as welding and assembling, are used to join separate parts together. Although these processes are similar to those used in metal fabricating establishments, machinery manufacturing is different because it typically employs multiple metal forming processes in manufacturing the various parts of the machine. Moreover, complex assembly operations are an inherent part of the production process. *NAICS 3331 (Agriculture, Construction and Mining Machinery Mfg) 3332 (Industrial Machinery Mfg) 3333 (Commercial and Service Industry Machinery Mfg) 3334 (Ventilation, Heating, Air-Conditioning, and Commercial Refrigeration Equipment Mfg) 3335 (Metal working Machinery Mfg) 3336 (Engine, Turbine, and Power Transmission Equipment Mfg) 3339 (Other General Purpose Machinery Mfg).
