

TEXAS INDUSTRY PROFILE

Furniture and Related Product Manufacturing NAICS 337 (Private Industry Only)

Industry Description

Industries in the Furniture and Related Product Manufacturing subsector make furniture and related articles, such as mattresses, window blinds, cabinets, and fixtures. The processes used in the manufacture of furniture include the cutting, bending, molding, laminating, and assembly of such materials as wood, metal, glass, plastics, and rattan. However, the production process for furniture is not solely bending metal, cutting and shaping wood, or extruding and molding plastics. Design and fashion trends play an important part in the production of furniture. The integrated design of the article for both esthetic and functional qualities is also a major part of the process of manufacturing furniture. Design services may be performed by the furniture establishment's work force or may be purchased from industrial designers. *NAICS 3371 (Household and Institutional Furniture and Kitchen Cabinet Mfg) 3372 (Office Furniture (including fixtures) Mfg. 3379 (Other Furniture Related Product Mfg).
