

# TEXAS INDUSTRY PROFILE

Educational Services  
NAICS 611 (Private Industry Only)

## Industry Description

Industries in the Educational Services subsector provide instruction and training in a wide variety of subjects. The instruction and training is provided by specialized establishments, such as schools, colleges, universities, and training centers. The subsector is structured according to level and type of educational services. Elementary and secondary schools, junior colleges and colleges, universities, and professional schools correspond to a recognized series of formal levels of education designated by diplomas, associate degrees (including equivalent certificates), and degrees. The remaining industry groups are based more on the type of instruction or training offered and the levels are not always as formally defined. The establishments are often highly specialized, many offering instruction in a very limited subject matter, for example ski lessons or one specific computer software package. Within the sector, the level and types of training that are required of the instructors and teachers vary depending on the industry. Establishments that manage schools and other educational establishments on a contractual basis are classified in this subsector if they both manage the operation and provide the operating staff. Such establishments are classified in the educational services subsector based on the type of facility managed and operated. \*NAICS 6111 (Elementary and Secondary Schools) 6112 (Junior Colleges) 6113 (Colleges, Universities, and Professional Schools) 6114 (Business Schools and Computer and Management Training) 6115 (Technical and Trade Schools) 6116 (Other Schools and Instruction) 6117 (Educational Support Services).
